

WMS: Did You Know?

From Professor Merlot

Bar Code Scanner: how do I set it up the Symbol LS4208?

#22

The following setup procedure is for quickly scanning items on the Invoice of WMS7. It is assumed the scanner is using a USB cable from the handheld unit.

1. Insert the USB cable into an available USB port. Beeper Sequence will be heard, Low/Medium/High beeps (Power Up). Scan the bar codes below in the following order.
2. This bar code sets the default parameters of the scanner. Beeper Sequence will be heard, High/Low/High/Low beeps.

3. This bar code appends a carriage return. Beeper Sequence; High/High beeps.

4. This bar code appends the data entry. Beeper Sequence; High/High beeps.

5. This bar code sends the Down Arrow entry. Beeper Sequence; High/High beeps.

6. This bar code sends the Left Arrow entry. Beeper Sequence; High/High beeps.

7. This bar code appends the final Enter sequence. Beeper Sequence: High/Low/High/Low beeps (Successful program exit).

8. This completes the bar code programming sequence for the Symbol bar code scanner. For each entry on an Invoice, with the mouse set on the Item Product entry, once an item is scanned, it will make the entry and go directly to a New Line below, ready for another item to be entered. The Quantity entry will default to 1.
