Store and Supplier's Information - Canadian

Product Information:

This following information is a list of all of the suppliers that we currently have installed in the WMS database. We will include all of the products from the suppliers you select to save you time entering them manually.

Currently, we have over 6,000 product items available for import into WMS. If you use a small number of products from a supplier, mark the checkbox, "Install Inactive". Then, in the future, you may easily add them to the active inventory by simply clearing the "Discontinued" checkbox for those specific products in the WMS system.

If you use a supplier not in the list below, please add their name and other contact information, and we will endeavor to contact them to add their items to our database.
