

Conversion Notes – CellarMeister to WMS

Introduction:

This information is provided for the users of the DOS program CellarMeister who are moving their Point of Sale system to the Windows based system, **The Wine Management System**.

Files & Location:

The following files are required for transferring the data about your customers, products and associated information. These are usually located in the folder:

C:\CM

The following is a list of the files required to complete the transfer of data to **The Wine Management System**:

- **Customer.dbf**
- **InvDet.dbf**
- **InvHist.dbf**
- **Product.dbf**
- **PrLists.dbf**
- **Supplier.dbf**
- **System.dbf**

How to Send Files:

1. Open Windows Explorer and select My Computer by double clicking on the icon folder. This will display all of the folders on that computer
2. Look for the folder labelled **CM** and double click on the folder to open it.
3. Inside this folder you will see the above files (this should be displayed in the right window pane of explorer).
4. Copy the above files to a diskette or zipped file and mail/email as an attachment to **The Wine Management System** at wms4wine@telus.net
5. When the conversion has been completed, the data from your CellarMeister software will be loaded onto your WMS2000 installation CD for quick and easy access from CD or from the installed software menu.
